**CC:**  
**Subject:** TEST Dimock's Carter Road residents' water NOW

Mr. Dandrea, Ms. Kelly, Mr. Fetzer, Mr. Heston, Ms. Taylor, & Mr. Polish,  
I am a tax paying, voting resident of Pennsylvania. This week my state's DEP announced that water in Dimock, PA is now clean & that Cabot Oil & Gas no longer has to provide residents with water buffaloes. [Link:  
<http://citizensvoice.com/news/dep-cabot-ok-to-stop-dimock-water-deliveries-1.1220633#axzz1bRqZzZlg>]

This is ridiculous, Dimock's water is still as toxic as it was following Cabot's poisoning of it.

Julie Sautner, a Dimock resident, just emailed the list of toxins her water contains, these include high levels of the following chemicals, heavy metals and radioactive materials:

acetone, aluminum, arsenic, barium, beryllium, bromodichloromethane, butylbenzylphthalate, chlorine, dibromochloromethane, ethane, lead, lithium, methane, nitrate, silicon, strontium, sulfate, TDS (total dissolved solids), thorium 228, uranium 234, 235, 238 (235 and 238 are weapons grade)

**I am calling on the federal EPA to test ALL of Carter Road's residents' water, this section of Dimock is the one affected.**

Thank you,
